WorléeAdd 678

Art.-No. 114007-00437

Revision: 29.04.11

W´Add 678 is a silicone free defoamer and anti-foam agent for solvent based and solvent free systems.

Technical Data:

Appearance	clear, low viscous liquid
Activity	approx. 10%
Flash point, DIN EN 22719	approx. 35 °C

Application and Properties:

W´Add 678 is mainly used to avoid foam and as defoaming agent in one- and two-component PUR paints and coatings. The recommended addition is, according to our experience, between 1.0 - 3.0%.

Caution:

W´Add 678 is supplied in inflammable liquids. Therefore protect from heat and keep away from open flame.
