WorléeAdd 602

Art.-No. 114009-01573

Revision: 30.01.03

W´Add 602 is an antifoam agent and defoamer mainly for 2 component PUR and epoxy resin coatings.

Technical Data:

Appearance	colourless, clear
Flash point, DIN EN 22719	approx. 59 °C
Active substance	approx. 1.3%
Solvent	isoparaffin. HC 170-200

Application and properties:

W´Add 602 should be added to the binder already during production before addition of other additives. Especially suitable is W´Add 602 for solvent free 2 component PUR coatings based on polyester resin / aromatic isocyanate. The usual addition quantities are between 0.4 - 2.0% calculated on total system.

Storage and shelf life:

W´Add 602 is delivered in an inflammable solvent, therefore protect from heat and keep away from open flame. In case of correct storage in unopened original containers W´Add 602 can be used min. 12 months from date of delivery.
