Art.-No. 114009-17117

Revision: 10.10.14

Additive for the reduction of surface tension in water dilutable and radiation curing paint systems.

Based on polydimethyl siloxane.

Technical Data:

Appearance	clear to slightly turbid yellowish liquid
Active substance	100%
Viscosity, Rheometer, 20 °C, C 60/2°, 1000 s ⁻¹	60 – 90 mPa·s
Flashpoint, DIN EN 22719	> 100 °C

Application and Properties:

Improves substrate wetting of liquid paint systems even on difficult surfaces.

Promotes levelling properties.

highly effective.

Anti-crater properties.

Dosage 0.1 – 1.0%.
