WorléeAdd 4415

Art.-No. 114008-22019

Revision: 17.03.2020

Oxim-free Anti-Skinning Agent with Pigment Wetting Properties

Technical Data:

Appearance	clear to slightly turbid, yellow-brownish, low viscous liquid
Chemical composition	N, N-diethyl hydroxly amine
Active substance	approx. 65%

Recommended Uses:

Oxime-free anti-skinning agent with pigment wetting properties. For use in solvent based air- and oven-drying alkyd resin systems.

Avoids foam formation when added to the pigment grind and provides long-term viscosity stability to solvent borne paint systems.

Typical use level is 0.1% to 0.5% on total formulation.

Incorporation:

WorléeAdd 4415 may be added at any stage of the production process after grinding. Post addition is also possible.

Optimal use levels for specific formulations should be evaluated by laboratory tests. If assistance is needed, please contact your Worlée representative.

Handling and Storage:

Store in a dry and cool place and keep containers tightly closed.

Shelf Life:

The storage stability of WorléeAdd 4415 in the originally closed barrel is at a storage temperature from + 5 to + 25 °C six months, counted from the day of the delivery ex works.
